|-------------------------|--|
| It's Your Choice | This is a research study. Being in this research study is your choice; you do not have to participate. If you decide to join, you can still stop at any time. You should only participate if you want to do so. You will not lose any services, benefits or rights you would normally have if you choose not to take part. |
| Research Purpose | The purpose of this research is to learn more about why people with celiac disease and gluten sensitivity get nausea, vomiting, bloating, abdominal pain, and diarrhea after eating gluten. |
| What's Involved | Study participation involves 5 visits and a possible one-time gluten exposure. Procedures include blood, urine, and stool testing. Study visits happen over the course of 8 to 14 days. The shortest visit is 30 minutes; the longest visit is 7 hours. |
| Key Information | <p>As a healthy volunteer, your greatest risks include possible infection at the site of the needle stick from the blood draw and the possibility of nausea, bloating or diarrhea from drinking the sugary solution. All risks associated with study participation are fully described later in this consent form, be sure to review them carefully.</p> <p>The goal of the study is to gather information; you will not directly benefit from participation.</p> <p>If you are injured because of study participation, we will help you get treatment. Costs for this care will be billed to you or your insurance.</p> |
| Learn More | If you are interested in learning more about this study, read the rest of this form carefully. The information in this form will help you decide if you want to participate in this research or not. A member of our research team will talk with you about taking part in this study before you sign this form. If you have questions at any time, please ask us. |
