IACUC Boot Camp
Columbus, OH
March 19, 2018

IACUC Boot Camp is a half-day, highly interactive overview of the oversight process for animal care and use programs. The first section of the boot camp will focus on federal regulations and policies and the role and responsibilities of the IACUC and other animal care program components. This section will consist of didactic presentations, structured to accommodate questions and answers throughout the session. The second section will present a series of case studies, which contain challenging regulatory and ethical issues pertinent to research involving animals. Participants will be encouraged to interact with the faculty and each other in open discussion and debate of the case study issues.

Learning Objectives:
- Understand IACUC membership requirements and functions
- Introduce specific requirements of the Animal Welfare Act regulations (USDA) and PHS Policy (OLAW), the Guide, and AAALAC International
- Review IACUC components and responsibilities, including: protocol review, criteria, and post-approval monitoring
- Explore other program requirements, such as: disaster planning, training, and occupational health program (OHP)

*Note: If you are taking both half-day preconference programs, please note that lunch will be available. If you are only taking this half-day workshop, lunch will not be provided.
